In order to satisfy the requirement under 37 C.F.R. §1.98(a)(3) for a concise explanation of the relevance of each item of information, applicant herewith submits a copy of the International Search. In addition, applicant notes with respect to any information that is not in English language as follows:

German Offenlegungsschrift DE 2 361 227 describes a mining shield supporter carrier which spans over a cutting machine in a mining road to permit a cutting machine to advance independently, without interruption. The shield supporter carrier has an arch-shaped frame, sliding base jacks mounted on the top portion of the arch-shaped frame and a lifting mechanism, so as to permit the assembling and installation of a shield supporter and the setting of beams for a main frame and foot frames as well.

German Offenlegungsschrift DE 26 45 496 describes a device for consecutively supporting a drift by means of caps and posts or props in dependence on face advancement. The device lifts and presses the caps to be positioned against the mine roof. A breast frame is movably suspended to the positioned caps for travel in direction of face advancement. Lifting beams form a support for the caps to be positioned and are supported on the breast frame for being lifted in upward direction, with a crane being guided on the breast frame for movement in direction of face advancement.

The above-identified application discloses and claims an invention patentable over this prior art.

Entry of the references above set forth into the file of the above application is believed to be in order and is respectfully requested.
